

Eclipse Royalty & Rights Management System powered by Microsoft Dynamics™ GP

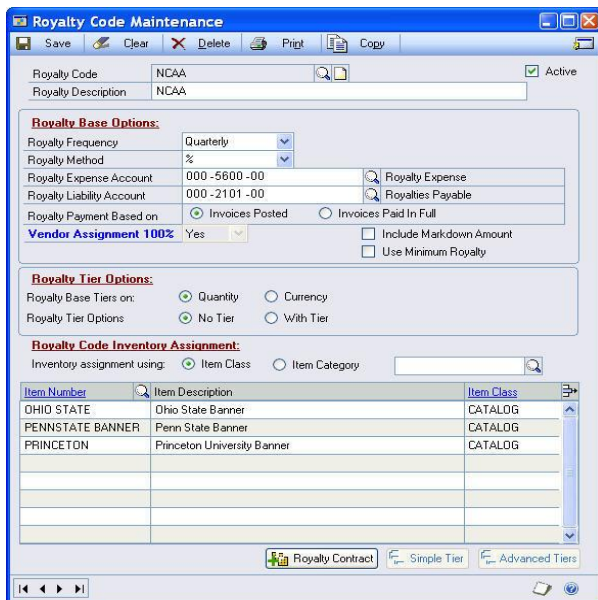

Overview

The Eclipse Royalty & Rights Management System (ERRMS) is an automated, end-to-end royalty accounting programme that includes flexible reporting solutions and an excellent audit trail to clearly demonstrate regulatory compliance and reassure rights holders of royalty accounting accuracy.

ERRMS is scalable, integrated, elegant, transparent, well supported, reasonably priced, and based on our 20 years of experience in the industry after extensive consultation with trademark organisations.

Product Capabilities

Royalty contract definitions are captured using the Royalty Code Maintenance window. Multiple Stock Keeping Unit (SKU's) can be combined into a single contract or you may have the same SKU over many contracts.

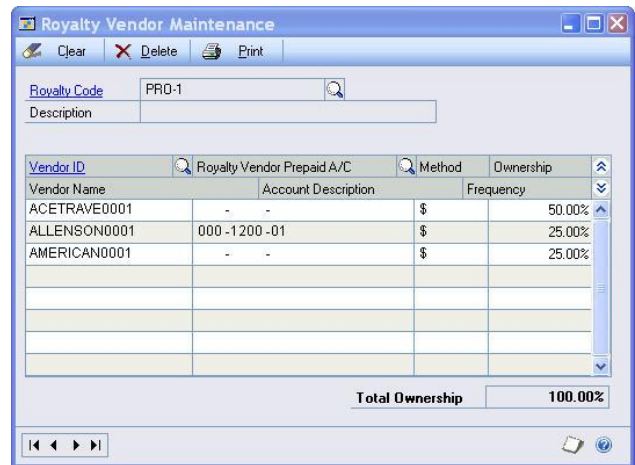

Royalty Definition Screen

Multiple rates can be managed either by volumes sold or by total sales dollars. More complex breaks can be defined for requirements such as distribution channel or method of sale such as direct sales, indirect sales or online sales.

Flexible royalty calculations can be based upon a fixed amount or as a percent of sales. A sale can include discounts or be based upon gross sales amounts. Payments can be made whenever an invoice is posted or may be withheld until the invoice is paid in full. Payments can be scheduled for monthly, quarterly annually or semi-annually processing.

Assigning a licensor to each contract is key because sometimes contracts require payments to be made to multiple owners. This is common in the music and publishing industry where royalty amounts may belong to more than one artist or author. It is also common in sports merchandising, where payments can be split between the league, team and athlete or agent. ERRMS system also manages advance payments and the normal monthly accrual process.

Support and Enhancement

Eclipse Business Dynamics offers an ongoing enhancement and support plan to all customers to ensure continued use of your software.

System Compatibility

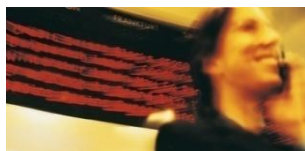

Built with Microsoft Dexterity™ the Eclipse Royalty & Rights Management System integrates seamlessly with Microsoft Dynamics™ GP.

Royalty & Rights Management System

Powered by Microsoft Dynamics™ GP
